

The Most Sustainable Charger on the Market.

Climate Neutral. Fully Recyclable. Engineered for Performance

As the market leader in culinary gas systems, iSi is committed to delivering the most sustainable solution in the industry — *for every single serving of whipped topping and carbonated beverage.*

Our sustainability commitment begins at product development and extends through production, transportation, and application in foodservice.

• 100% Climate Neutral Chargers

Use and transportation are entirely climate neutral through certified factory initiatives and emissions compensation projects. <https://isi.com/en-GB/group/sustainability>

• Produced in a Climate-Neutral Factory

Our manufacturing operations are designed to minimize climate-impacting emissions from development through production.

• European Steel Construction

Manufactured from high-quality European steel containing up to 30% recycled material.

• Reduce Waste Costs

All iSi soda, cream, and nitro chargers are made from steel and are 100% recyclable where facilities exist. Paired with long-lasting stainless steel iSi whippers, the iSi system offers a more sustainable alternative to disposable whipped cream cans, helping operators reduce waste, lower disposal costs, and support sustainability goals.

• Legendary iSi Innovation & Quality

Sustainability never comes at the expense of performance. iSi chargers deliver consistent fill, maximum yield, and unmatched reliability.

• Leading the industry means leading responsibly.

iSi combines climate responsibility with culinary precision — offering customers the most sustainable solution with measurable bottom line savings.

Better for Earth, Better for Business.

The Eco Series Green Whip

- Maximize profitability with up to 15% greater dairy cream output. Combined with Eco Series chargers, the system can reduce whipped cream costs by up to 35% per serving versus other whipper and charger systems.
- 100% climate neutral through emissions compensation projects [iSiEcoSeries.com](https://www.iSiEcoSeries.com)
- Entirely Stainless Steel construction for long lasting professional service
- Includes two long-life stainless steel tips
- Now available in both 1.0L/1 Qt. and 0.5L /1 Pt. sizes
